HAYU
YONATAN
WEB DEVELOPER

About Me

As a skilled Web Developer, I specialize in building responsive and user-centric web applications using React.js, TypeScript, and Next.js. My expertise in JavaScript, Tailwind CSS, and API integration allows me to create dynamic and accessible user experiences. With experience in PostgreSQL and Node.js, I develop scalable and robust full-stack solutions. Proficient in debugging, performance optimization, and Git, I write clean, modular code. Passionate about coding and innovation, I thrive in collaborative environments and deliver optimized digital experiences that meet user and business needs
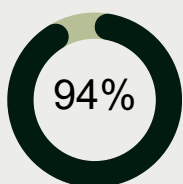

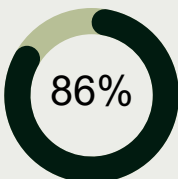

Education:

UNDER GRADUATED:
AT HARAMAYA UNIVERSITY

- I'm a 3rd year Software engineering Student. I also teach my self on web Development for past 2 years and i did some solid projects

Professional Experience:

WEB DEVELOPER:
AMAZOON-ECOMMERCE-PLATFORM

- Cloned the Amazon e-commerce website, replicating features like user authentication, product listings, and a shopping cart. Built with React, Node.js and integrated payment processing for a responsive user experience.

- **NETFLIX- WEB-BY REACT-APP**
  - Cloned the Netflix streaming website, fetching data using Axios to display content dynamically. Built with React, integrating a backend for media data and using a responsive UI for an optimized user experience

- **Face Recognition Attendance System (Web-Based)**
  - Built a web-based attendance system using Python, Flask, OpenCV, and face recognition libraries such as face_recognition and scikit-learn to detect and verify faces in real time for automated attendance tracking.
